MILDEWSTAT (on hard inanimate surfaces) FUNGICIDE (against Pathogenic fungi)

EMERGING VIRAL PATHOGEN – 2019 Novel Coronavirus (2019-nCoV) – Wuhan

NEUTRAL DISINFECTANT CLEANER (EPA Reg. No. 1839-169-10693) has demonstrated effectiveness against viruses similar to 2019 novel coronavirus (SARS-CoV-2) on hard non-porous surfaces. Therefore, this product can be used against 2019 novel coronavirus (SARS-CoV-2) when used in accordance with the directions for use against Rotavirus on hard, non-porous surfaces. Refer to the CDC website at (<https://www.cdc.gov/coronavirus/2019-ncov/index.html>) for additional information.

DESCRIPTION: **NEUTRAL DISINFECTANT CLEANER** is a phosphate free, pH neutral formulation designed to provide effective cleaning, deodorizing, and disinfecting for hospitals, nursing homes, hotels, and schools, where housekeeping is of prime importance in controlling cross-contamination from treated surfaces. **NEUTRAL DISINFECTANT CLEANER**, when used as directed, is formulated to disinfect the following hard, non-porous, inanimate, environmental surfaces: floors, walls, shower stalls, and bathtubs. **NEUTRAL DISINFECTANT CLEANER** is not for use on medical device surfaces. **NEUTRAL DISINFECTANT CLEANER** is formulated to a neutral pH and will not dull high-gloss floor finishes with repeated use.

GENERAL CLEANING – Apply **NEUTRAL DISINFECTANT CLEANER** to soiled area with a mop, cloth, sponge, or hand-pump trigger sprayer. **NEUTRAL DISINFECTANT CLEANER** can be diluted at 2 ounces per gallon or applied at full strength. Thoroughly wet soiled surface and scrub as necessary.

DISINFECTION – For heavily soiled areas, a pre-cleaning step is required. Prepare a fresh solution for each use. To disinfect inanimate, hard, non-porous surfaces add two (2) ounces of **NEUTRAL DISINFECTANT CLEANER** per gallon of water. Apply solution with a mop, cloth, sponge, or hand-pump trigger sprayer, so as to wet all surfaces thoroughly. Allow to remain wet for 10 minutes, then remove excess liquid. For sprayer applications, spray 6 - 8 inches from surface, rub with brush, sponge, or cloth. Do not breathe spray mist.

DEODORIZATION: To deodorize, apply **NEUTRAL DISINFECTANT CLEANER** as indicated under the heading DISINFECTION.

BACTERICIDAL ACTIVITY – At the two (2) ounce per gallon dilution, **NEUTRAL DISINFECTANT CLEANER** demonstrates effective disinfectant activity against the organisms: Pseudomonas aeruginosa PRD-10, Salmonella (choleraesuis) enterica, Staphylococcus aureus, Escherichia coli, Listeria monocytogenes, Vancomycin resistant Enterococcus faecalis (VRE). Methicillin resistant staphylococcus aureus (MRSA), and Vancomycin intermediate resistant Staphylococcus aureus (VISA), Community Associated Methicillin Resistant Staphylococcus aureus (CA-MRSA), Community Associated Methicillin resistant Staphylococcus aureus (CA-MRSA). Kills Pandemic 2009 H1N1 Influenza A virus (formerly swine flu).

MILDEWSTAT – To control mold and mildew (such as Aspergillus niger) and the odors they cause on pre-cleaned, hard non-porous inanimate surfaces, add two (2) ounces of **NEUTRAL DISINFECTANT CLEANER** per gallon of water. Apply solution with a cloth, mop, or sponge making sure to wet all surfaces completely. Let air dry. Prepare a fresh solution for each use. Repeat application at weekly intervals, or when mildew growth appears.

FL11166/sl

FUNGICIDAL ACTIVITY – At the two (2) ounce per gallon dilution, **NEUTRAL DISINFECTANT CLEANER** is fungicidal against the pathogenic fungi, trichophyton mentagrophytes (Athlete’s foot fungus), and Candida albicans. Apply solution with a cloth, sponge or hand pump trigger sprayer to hard, non-porous surfaces found in bathrooms, showers stalls, locker rooms, exercise facilities or other clean, hard non-porous surfaces commonly contacted by bare feet. Allow surface to remain wet for 10 minutes, then remove excess liquid. Diluted product should be applied daily or more frequently with heavy facility use.

VIRUCIDAL ACTIVITY – This product when used on environmental, inanimate, hard, non-porous surfaces exhibits effective virucidal activity against HIV-1, HIV-2, Hepatitis B Virus (HBV), Hepatitis C virus (HCV) Herpes Simplex Type 1 (causative agent of fever blisters), Herpes Simplex Type 2 (genital) influenza A2/Hong Kong, Vaccinia, Rotavirus, Human Coronavirus (ATCC VR-740),(Strain 229E), SARS Associated Coronavirus, Rabies Virus, Bovine Viral Diarrhea Virus (BVDV), Pseudorabies, Bovine Rhinotracheitis, Feline Leukemia, Feline Picomavirus and Canine Distemper Virus, Avian Influenza A Virus, and Porcine Respiratory and & Reproductive Syndrome Virus (PRRSV). Add two (2) ounces of **NEUTRAL DISINFECTANT CLEANER** per gallon of water. For heavily soiled areas, a pre-cleaning step cleaning step is required. Apply solution with a cloth, mop, sponge, or hand-pump trigger sprayer to wet all surfaces thoroughly. Allow the surface to remain wet for 10 minutes, then remove excess liquid. **KILLS HIV-1, HIV-2 HBV AND HCV ON PRECLEANED ENVIROMENTAL SURFACES/OBJECTS PREVIOUSLY SOILED WITH BLOOD/BODY FLUIDS** in health care settings (Hospitals, Nursing Homes) or other settings in which there is an expected likelihood of soiling of inanimate surfaces/objects with blood or body fluids and in which the surfaces/objects likely to be soiled with blood or body fluids can be associated with the potential for transmission of Human Immunodeficiency Virus Type 1 or 2 (HIV-1 or HIV-2) (associated with AIDS), Hepatitis B Virus (HBV) and Hepatitis C virus (HCV).

SPECIFICATIONS:

Color.....	Clear Yellow
Fragrance.....	Lemon
Type of surfactants	Non-ionic, Cationic
Phosphates	None
% Active Quat	5.4-5.7
pH.....	6.8 – 7.5
Specific Gravity	0.996 – 1.016
Shelf Life.....	1 Year
