DRY FOAM SHAMPOO

Quick Drying / Soil Retardant

DESCRIPTION: **DRY FOAM SHAMPOO** is specially formulated for use in dry foam machines. It removes oil and greasy soil with its solvents, as well as water-soluble soil. It contains optical brighteners and dries to crystal form and leaves no sticky residue. **DRY FOAM SHAMPOO** may be used in either carpet machine - a dry foam or a conventional type.

DIRECTIONS FOR USE: Remove furniture if possible. Vacuum thoroughly. Spot clean carpet for removal of heavy stains and clean corners using a hand brush. Always test in an inconspicuous area for colorfastness.

ROTARY SHAMPOO MACHINES:

Light Soil: Use 2-4 ounces (¼ to ½ cup) of shampoo per gallon of water.

Moderate Soil: Use 6 ounces (¾ cup) of shampoo per gallon of water.

Heavy Soil: Use 8 ounces (1 cup) of shampoo per gallon of water.

FOAM GENERATING EQUIPMENT:

Light to Moderate Soil: Use 6-8 ounces (¾ to 1 cup) of shampoo per gallon of water.

Heavy Soil: Use 12 ounces (1½ cup) of shampoo per gallon of water.

Apply and return - building only enough suds so that a small wall of foam is kept in front of machine. If carpet is very soiled, a second pass may be used. Set pile in one direction to insure even drying and to avoid streaks. Dry the carpet for approximately one hour. Vacuum crystals when dry.

SPECIFICATIONS:

Color	Clear Light Blue
Fragrance	Banana
pH	8.2 - 9.2
Specific Gravity	1.037 – 1.057
Type of Surfactants.....	Biodegradable, Anionic
Phosphates	Yes
Free Alkali	Slight
Grease Cutting Ability.....	Very Good
Soil Penetration	Excellent
Volatile Organic Compound (VOC)	< 2 g/L

Refer to the Safety Data Sheet (SDS) and product label for additional information including Hazard and Precautionary statements, first aid measures, and storage and handling.
